OBJECTIVE

Motivated and detail-oriented BS Computer Science student with hands-on experience in full-stack web development, mobile application development, cybersecurity, and digital content creation. Skilled in React, frontend and backend development, SQL databases, and modern web technologies through academic coursework and practical projects. Passionate about building scalable digital solutions and gaining industry experience.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Dart, PHP

Web Development: React.js, HTML5, CSS3, Node.js, Express.js, REST APIs, JWT, MongoDB, SQL, FastAPI, Figma, Maze

Mobile Development: Flutter, Dart

AI / Machine Learning: YOLOv8, DeepFace, MediaPipe, DeepSORT, OpenCV, Emotion Detection

Tools & Platforms: Git, GitHub, Website Deployment (Vercel/Netlify), XAMPP, Responsive Web Design

EXPERIENCE

Lead Web Developer | KEYF Coffee Brand

October 2025 – January 2026

- Developed a comprehensive visual identity and marketing strategy for a specialty cold brew coffee brand.
- Engineered a dedicated web platform with specialised design elements and intuitive user flows.

Freelance Web Developer | Self-Employed

Current

- Developing and managing professional websites for clients, handling frontend design, backend integration, and deployment.
- Collaborating with clients to deliver responsive web solutions; current project planned for Vercel deployment.

Freelance Video Editor | Self-Employed

Current

- Editing promotional, social media, and creative video content using Adobe Premiere Pro and DaVinci Resolve.
- Managing project timelines and delivering high-quality content for diverse clients.

Software Development Intern (ERP Project) | University Collaboration

Ongoing

- Designing an ERP module to automate final year project submissions, eliminating manual administrative tasks.
- Architecting database schemas and backend workflows for student submissions, reviewer assignments, and approval pipelines.
- Working directly with stakeholders to gather functional requirements and translate them into technical specifications.

PROJECTS

AI-Powered Surveillance System | Python, YOLOv8, DeepFace, MediaPipe, DeepSORT, OpenCV

- Built a real-time multi-modal surveillance platform integrating object detection, facial recognition, hand gesture analysis, and multi-object tracking.
- Developed an emotion detection pipeline capable of identifying human expressions from live video on a frame-by-frame basis.
- Implemented an automated email alert system triggered upon detecting predefined events for immediate incident response.

CarryClicks – Full-Stack E-Commerce Platform | JavaScript, Node.js, Express.js, MongoDB, JWT

- Engineered a complete e-commerce web application featuring product browsing, JWT-based authentication with role-based access control, and checkout processing.
- Built RESTful APIs with Node.js/Express.js connected to MongoDB; designed responsive frontend for seamless cross-device experience.

Melodies – Cross-Platform Music Streaming App | Flutter, Dart

- Built a mobile music application for Android and iOS with audio playback controls, playlist management, and a clean modern UI.
- Applied Flutter's widget architecture to build reusable components, reducing code duplication and improving maintainability.

PBL Management System – ERP Solution | PHP, MySQL, XAMPP

- Developing a web-based ERP for Project-Based Learning management, featuring project submission tracking, student/mentor dashboards, evaluation rubrics, and real-time data visualisation.

EDUCATION

BS (Hons) Computer Science

Beaconhouse National University (BNU), Lahore | 2023 – Present | Expected Graduation: 2027

Intermediate in Computer Science (ICS)

Defence Degree College, Lahore | 2021 – 2023

O Levels

Beaconhouse Defence Campus, Lahore | 2019 – 2021

CERTIFICATIONS

Cybersecurity – Coursera (BNU-affiliated) | 2024 | Topics: Network Security, Cryptography, Threat Detection, Risk Management

SOFT SKILLS

Problem Solving • Team Collaboration • Communication • Attention to Detail • Continuous Learning
